1. Permits, Change, Transfer, Renewal, Sale

Pending actions: No pending actions.

2. Signs and Markers

The mine ID signs are located at the contact points of the public road to the permit area and contains all of the appropriate information. All other signs and markers observed during the inspection were in compliance with the approved MRP.

The ID sign on the west side of the public access into the permit area had been re-installed, but had blown loose again. Richard Safley is going to obtain materials and re-secure the sign to give it more strength.

7. Coal Mine Waste, Refuse Piles, Impoundments

Mining was occurring on top of the refuse pile in lifts from the east to the west. No visible hazards were noted. Culvert that was removed from the diversion repair in June is still on top of the refuse pile and should be removed.

8. Noncoal Waste

See item 7 (Culvert).
